(54) PLUG AND PLAY SECURITY SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To make it possible to sufficiently provide theft prevention effect even when the owner of a house is absent, by providing a main control unit or the like for transmitting a sound message recorded in advance to a preset telephone number of a party to be called, when an external sensor interface senses an abnormality.

SOLUTION: This device has a DTMF signal decoder 5 connected between a telephone line interface 4 and a main control unit 1. Also, the device has an STMF signal decoder 7 and a sound module recording/reproducing circuit 8 connected between a connection/cut controller 6 and the main control unit 1. The main control unit 1 has a micro-controller 2 and a memory 3, and stores a telephone number of a desired dialed party, a password code of an electronic key and status data. Then, when an external sensor interface 9 senses an abnormality, the main control unit 1 transmits a sound message recorded beforehand to the dialed party of a preset telephone number.
